

for high performance synthetic blend gear oils

Formulated with a unique blend of premium synthetic and conventional base oils, DuraGear is a superior extreme pressure lubricant. This special transmission oil is suitable for most conventional manual gearboxes and front wheel drive transaxles. Overcomes difficult low temperature gear changes and high temperature rattles.

- Superior anti-wear, anti-scuffing and corrosion protection
- Provides superior performance at low temperatures
- Resists breakdown at high temperatures

Viscosities Available:

DURAGEAR SAE 75W-85

DURAGEAR SAE 75W-90
