

# for 4 stroke motorcycles

## 4 stroke motorcycle motor oil

Designed specifically for the wet clutch systems, high RPMs and temperature conditions found in motorcycles. The product utilises premium base oils and advanced additives to ensure excellent performance and protection. The thermally stable formula protects engines under high RPM and high temperature conditions.

- Wet clutch protection
- Special cleaning agents and dispersants help prevent deposit formation to keep engine clean.
- Contains proper balance of additives for maximum horsepower
- Increased anti-wear agents (zinc and phosphorus) to minimise wear
- Shear stable viscosity improves better resist oil film breakdown.
- Advanced additives help prevent foaming and maintain proper lubricating film to offer high performance RPM.
- A balance of additive system to resist rust and corrosion.
