## it's armour for your engine

The range of Engine Armour engine oils utilise a synthetic blend formulation to minimise engine wear and extend the life of your car. There is a range of Engine Armour products to meet a variety of engine requirements.

### Engine Armour 15W-40

- Blended with synthetic lubricants and premium base stocks to meet the performance requirements of API SM/CF and the European specification ACEA A3 B3.
- Suitable for most petrol powered and light duty diesel passenger vehicles including turbocharged and multi-valve engines.
- Exclusive Chemaloy additive system reduces engine wear at start-up, keeps engine parts cleaner and provides maximum protection at all operating temperatures.

### Engine Armour 10W-30

- Meets the requirements of Ford, Holden and selected Japanese manufacturers specifying with a 7.5W-30 or 10W-30 SM/CF, ILSAC GF-4 motor oil.
- Maximum protection during start-up and under severe operating conditions, reducing engine wear.
- Contains highly efficient detergents, dispersants and inhibitors to protect against corrosion, sludge, oxidation and wear.
- Improved fuel economy in relation to conventional 20W-50 and 15W-40 motor oils.

### Engine Armour 10W-40

- Blended with synthetic lubricants and premium base stocks to meet the performance requirements of API SM/CF and ACEA A3 B3.
- Shields vital engine components from wear at start up.
- Increases engine protection at high temperatures.
- Provides advanced deposit control for improved engine cleanliness.
- Provides enhanced viscosity control for the life of the oil.
- Suitable for most petrol engines and light duty passenger diesels.
